

Warburton Advancement League

Presents - Rod Ingham

What is Happening to the Yarra?

How healthy is the river?

What about water being
removed?

What about run off?

The Warburton Advancement League has been active for many years in the Yarra Valley with one of its most noticeable projects being the beautification of the banks of the Yarra River. Appreciated by both locals and tourists alike the Yarra River is not only a major attraction but a living ecosystem that needs to be preserved for future generations to enjoy. At this years Annual General Meeting the League have invited Mr Rod Ingham to speak. Rod has studied Geography and Environmental Science. He is currently Project Officer for the Yarra Riverkeeper Association and is tasked with patrolling the river, testing water quality and publicising river issues through his various speaking engagements. Join us to hear Rod speak on issues such as; the health of the river, the effects of urban expansion, and how run off and extraction of water from the river is effecting its health. Local River Reserve representatives will also be present to discuss their aims and plans for the river.
